

GoodLeap Integration Overview Tier 3

Overview:

Throughout this document you will find a detailed guide on how to get started with GoodLeap. This includes access to our API documentation, highlighted endpoints, and pre-configured sample postman collections and environments. For security reasons, your API Keys and Sandbox access will be sent in a separate secure email. Should you have any questions please reach out to us at APISupport@goodleap.com.

Getting Started

This page has step by step instructions on how to get started. You can also take a look at our developer API portal which includes a robust outline of all GoodLeap API functionality and dozens of recommended test scenarios. You can also use our pre-configured Postman collection sent as part of this email.

Postman Collection

To make it easy, we created a Postman collection with all the endpoint calls pre-configured. These collections will be included separately as an attachment to this email.

Developer Portal

<https://developer.goodleap.com>

Username: loanpal

Password: Cle@nEnergy!

We provide two environments: sandbox and production. All testing should be done in the sandbox environment

Sandbox base url: <https://sandbox01-api.loanpal.com/posfinancing/rest/v2/>

API keys will be emailed to you in a secure email.

After importing the postman environment you will need to insert your credentials and other values for the default variables:

▼ Postman variables

- **devapi-orgid** is your Username
- **devapi-orgkey** is your Password
- **devapi-disclosuretoken** will be populated from the token in the response after making a GET request to [/v2/disclosures](#). **NOTE:** The disclosure token is single use and will expire in 24 hours. It needs to be re-generated by making a GET request to [/v2/disclosures](#). If you are using the Sandbox postman environment included above, it will populate the `devapi-disclosuretoken` value.
- **devapi-icat** "SOLAR" (already populated for you)
- **devapi-icatid** you can find category ids by making a GET request to [/v2/categories](#) (we already pre-populated this in the postman environment with the SOLAR category id)
- **devapi-hicuploadurl** used to hold the signed upload url after making a GET request to [/v2/loans/:loanId/uploadurls?uploadType=HIC](#). The postman collection will automatically set this variable which is then used in the *Upload a HIC* request.
- **devapi-caseuploadurl** used to hold the signed upload url after making a GET request to [/v2/loans/:loanId/cases/:caseId/uploadurl](#). The postman collection will automatically set this variable which is then used in the *Upload a File to a Case Upload URL* request.

User Management

Managing your organization's users via API

- GET roles and channels [GET v2/users/roles-channels](#)
- POST create user [POST v2/users](#)
- GET organization users [GET v2/users](#)
- PUT users information [PUT v2/users/{ID}](#)
- PUT update channels [PUT v2/{id}channels](#)
- PUT users license [PUT v2/users/{id}/license](#)
- PUT update role [PUT v2/users/{id}/role](#)

The first step to managing your organization's users will be to make a `GET` request to [v2/users/roles-channels](#) to identify the available roles and channels that will be used to create the user.

▼ Sample response

```
1 {
2   "roles": [
3     {
4       "id": "497f6eca-6276-4993-bfeb-53cbbbba6f0
5       "name": "string"
6     }
  ]
}
```

```

7   },
8   "channels": [
9     {
10      "id": "497f6eca-6276-4993-bfeb-53cbbbba6f0",
11      "name": "string",
12      "code": "string"
13    }
14  ]
15 }

```

Next make a `POST` request to [v2/users](#) to create the new user.

▼ Sample response

```

1  {
2    "id": "497f6eca-6276-4993-bfeb-53cbbbba6f08",
3    "firstName": "string",
4    "lastName": "string",
5    "email": "user@example.com",
6    "phoneNumber": {
7      "type": "MOBILE",
8      "number": "string"
9    },
10   "enabled": true,
11   "license": {
12     "id": "string",
13     "status": "ACTIVE"
14   }
15 }

```

From there you can update user information at any point by making a `PUT` request to one of the following endpoints depending on the information that needs to be updated:

- Update user Information - [v2/users/{ID}](#)
- Update user channels - [v2/{id}channels](#)
- Update user license - [v2/users/{id}/license](#)
- Update user role - [v2/users/{id}/role](#)

You can also make a `GET` request to [v2/users](#) to obtain a collection of users belonging to your organization.

▼ Sample response

```

1  {
2    "data": [
3      {
4        "id": "497f6eca-6276-4993-bfeb-53cbbbba6f0",
5        "firstName": "string",
6        "lastName": "string",
7        "email": "user@example.com",
8        "phoneNumber": {
9          "type": "MOBILE",
10         "number": "string"
11       },
12       "enabled": true,
13       "license": {
14         "id": "string",
15         "status": "ACTIVE"

```

Pre-submission

```
16     }
17   }
18 ],
19 "pagination": {
20   "page": 1,
21   "pageSize": 10,
22   "totalPages": 5,
23   "count": 44
24 }
25 }
```

Using the payments calculator endpoint (GET [/v2/payments](#))

In order to retrieve pricing details you will need to follow the steps below:

- GET promotions [GET /v2/promotions](#) (optional, used for ACH discount options)
- GET loan offers [GET /v2/offers](#)
- GET payments [GET /v2/payments](#). Include all `offerIds[]`, `promotionIds[]` (optional, used for ACH discount options), and `amount`

The first step in retrieving **loan offers** is to check what promotions are available to your organization. Currently we offer a discount when customers sign up for autopay. Make a `GET` request to [/v2/promotions](#) for a list of available promotions.

▼ Sample response

```
1  {
2    "data": [
3      {
4        "id": "2345f0aa-db7a-42b9-807b-9e8a8
5        "name": "ACH",
6        "description": "An incentive for aut
7        "meta": {
8          "cursor": null
9        }
10     }
11   ],
12   "links": {
13     "prev": null,
14     "next": null
15   }
16 }
```

Now that you've checked your promotions, you're ready to see your loan offers. The list of available loan offers can be configured to include the 10 and 15 year options, or any other loan offers that you would like to include. Additional grouping of loan options can be configured through channels as needed. If you include the promotion ID for ACH discount you'll receive a list of offers with that discount applied.

Once you have the loan offer id(s) from the offers endpoint, you're ready to hit the payments endpoint. You will need to pass as parameters: `promotionIds[]` (optional), `amount`, and `offerIds[]`

e.g. `/v2/payments?promotionIds[]=2345f0aa-db7a-42b9-807b-9e8a82b81ae3&amount=20485.55&offerIds[0]=677d75f3-6f23-4c33-b07a-00339c32ef15&offerIds[1]=18b08d01-4c8f-4119-89f5-e3a49f159ac4`

The response would look something like the following: ([GET /v2/payments](#))

▼ Sample response with ACH promotion ID

```
1  [
2    {
3      "offerId": "677d75f3-6f23-4c33-b07a-0033
4      "promotionIds": [
5        "2345f0aa-db7a-42b9-807b-9e8a82b81ae
6      ],
7      "loanAmount": {
8        "value": 20485.55,
9        "type": "USD"
10     },
11     "disclaimerText": "Final terms will be p
12     "calculations": [
13       {
14         "paydownAmount": null,
15         "amount": {
16           "value": 223.57,
17           "type": "USD"
18         },
19         "roundedAmount": {
20           "value": 224,
21           "type": "USD"
22         },
23         "type": "INITIAL",
24         "interval": "MONTHLY",
25         "paymentDescription": "Estimated
26       },
27       {
28         "paydownAmount": null,
29         "amount": {
30           "value": 333.09,
31           "type": "USD"
32         },
33         "roundedAmount": {
34           "value": 333,
35           "type": "USD"
36         },
37         "type": "ADJUSTED",
38         "interval": "MONTHLY",
39         "paymentDescription": "Estimated
40       },
41       {
42         "paydownAmount": {
43           "value": 6145.66,
44           "type": "USD"
```

```

45         },
46         "amount": {
47             "value": 223.57,
48             "type": "USD"
49         },
50         "roundedAmount": {
51             "value": 224,
52             "type": "USD"
53         },
54         "type": "ADJUSTED_W_PAYDOWN",
55         "interval": "MONTHLY",
56         "paymentDescription": "Estimated
57     }
58 ]
59 },
60 {
61     ...
62 }
63 ]

```

The same request without ACH promotion ID: `/v2/payments?amount=20485.55&offerIds[0]=677d75f3-6f23-4c33-b07a-00339c32ef15&offerIds[1]=18b08d01-4c8f-4119-89f5-e3a49f159ac4`

▼ Sample response without ACH promotion ID

```

Loan Submission

Submitting an application ([POST /v2/loans](#))

Now that you have an offerId and the user has accepted the pricing details, we're ready to collect customer info and submit the loan application. To do so, follow the steps below:

- Insert the loan offer id you received from [GET /v2/offers](#)
- Insert applicant information
- **OPTIONAL**: Insert co-applicant (if there is no co-applicant then remove the object completely from the payload)
- Insert AUTOPAY enrollment, this will enroll them in ACH as default. e.g. "enrollments": { "AUTOPAY" } (see payload below)
- **submittingUser**: This will be a user setup in the GoodLeap system that will be used to submit loans. We can create a default user for you.

Making a `POST` request to [/v2/loans](#) will **submit the application** to GoodLeap.

Note: For testing in the sandbox environment, you may replace applicant and submitting user emails to your own so you can

receive notifications.

▼ Sample request

```
1  {
2    "referenceNumber": "Silver12345",

Submit Application Response

The submit loan response will include the status of the application.

The possible statuses returned are:

- APPROVED (may include deferred stipulations)
- CONDITIONAL (includes non-deferred stipulations)
- PENDING (typically returned when a consumer's credit is frozen)
- DECLINED

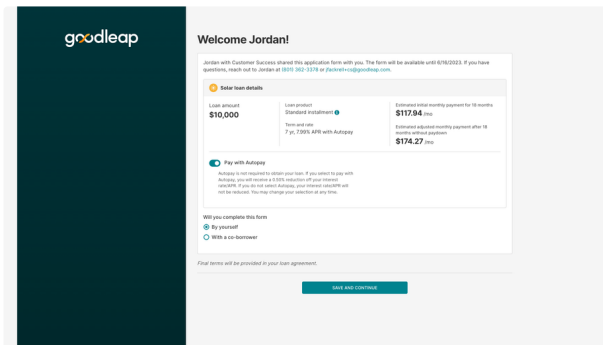

The **type** field represents the "who" when the approval is made

- SINGLE
- COMBINED
- PRIMARY
- SECONDARY

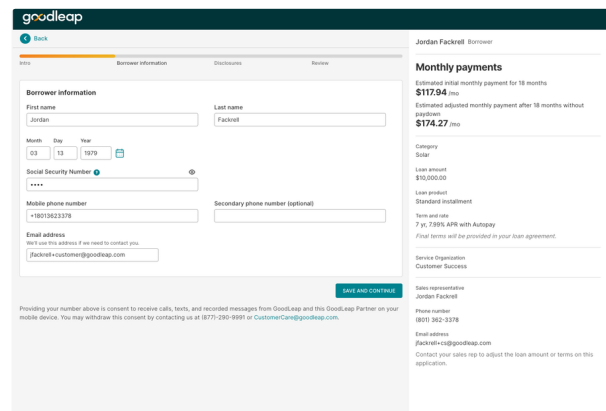

Note: See the *Test Cases in the Sandbox Environment* section below for details on how to test these different scenarios in the sandbox environment.

Sample GoodLeap application flow

- ✓ GoodLeap application flow sample with disclosures and signature field

The image shows the GoodLeap welcome screen for a user named Jordan. The screen has a dark green sidebar with the GoodLeap logo. The main content area is white and contains a welcome message, loan details, and a section for paying with Autopay. The loan details include a loan amount of \$10,000, a loan product of Standard Installment, and a term and rate of 7 yr, 7.99% APR with Autopay. The estimated monthly payment is \$117.94, and the estimated adjusted monthly payment after 18 months without autopay is \$174.27. The section for paying with Autopay includes a note that Autopay is not required to open your loan, but if you select to pay with Autopay, you will receive a 0.5% reduction off your interest rate. The screen also includes a section for who you complete this form, with options for 'By yourself' (selected) and 'With a co-borrower'. A 'Skip and continue' button is at the bottom right.

The image shows the GoodLeap Borrower information screen. The screen has a dark green sidebar with the GoodLeap logo and a 'Back' button. The main content area is white and contains a 'Borrower information' section with fields for first name, last name, month, day, year, social security number, mobile phone number, and email address. The 'Monthly payments' section shows the estimated monthly payment of \$117.94 and the estimated adjusted monthly payment after 18 months without autopay of \$174.27. The 'Category' section shows the loan amount of \$10,000.00, the loan product of Standard Installment, and the term and rate of 7 yr, 7.99% APR with Autopay. The 'Service Organization' section shows the sales representative as Jordan Packell. The screen also includes a 'Skip and continue' button at the bottom right.

SUMMIT TO SUCCESS

Note: Additional fields not currently included in the Silver sample application screen provided:

- Citizenship
- Preferred language (English/Spanish)
- Home ownership questions (slightly different responses)
- Disclosures text
- Signature field (for the applicantSignature base64 string in the payload)

Test Cases in the Sandbox Environment

Having a broad range of scenario coverage and predictable responses from the [POST /v2/loans](#) resource is an important part of testing any API so we've implemented the following set of SSN range driven test cases to cover possible scenarios. Other required test case identity information besides the SSN must be fictitious and can be made up (Name: John Doe, Address: 123 Main St. Roseville, CA 95661, DOB: 1/1/1980, etc.).

Single Applicant Test Scenarios

- **SSN Range** - any digits in the SSN range indicated by an `x` character are wildcards and can accept any number for that position and they will still access the corresponding test scenario
- **4 Digit SSN** - the `ssn` field supports full 9 digit SSNs or the last 4 digits of the SSN so this field represents the 4 digit SSN to pass in to access the corresponding test scenario

▼ Single Applicant Test Scenarios

Status	Solar Max Loan Amount (Battery)	Non-Deferred Stipulation	Deferred Stipulation	SSN Range	4 Digit SSN	Other Inputs Required
APPROVED	\$100,000 (\$50,000)	none	none	500101xxx	0101	none
APPROVED	\$100,000	none	ID_VALIDATION	50010221	0124	none

	(\$50,000)			x		
APPROVE D	\$50,000 (\$35,000)	none	none	5003 01xxx	0112	Income >= \ \$50,000
APPROVE D	\$50,000 (\$35,000)	none	ID_VALIDATION	5003 0225 x	0141	Income >= \ \$50,000
CONDITIO NAL	\$50,000 (\$35,000)	MORTGA GE_PAY MENT _VERIFIC ATION	none	5003 031x x	0189	Income >= \ \$50,000
CONDITIO NAL	\$50,000 (\$35,000)	INCOME_ VERIFICA TION	none	5003 0241 x	0146	Income >= \ \$260,000
DECLINED	none	none	none	5002 05xxx	0162	none
PENDING	none	none	none	5003 04xxx	0142	none

Co-Applicant Test Scenarios

- co-applicant scenarios are created by combining scenarios from the single applicant list

▼ Co-Applicant Test Scenarios

Type	Applicant SSN	Co-Applicant SSN
COMBINED	50010221x	500101xxx
PRIMARY	500101xxx	500205xxx
SECONDARY	500205xxx	500101xxx

APPLICANT_HAS_ACTIVE_LOAN Check

one of the pre-screen rules checks for duplicate active loans for an applicant and if faced during testing can be bypassed by incrementing the value of the street address (submit your first test case with 123 Main St and then your second test case with 124 Main St to bypass the active loan check).

Note that the postman environment provided above will automatically increment the street address for you.

Use the sandbox environment for all testing purposes: <https://sandbox01-api.loanpal.com/posfinancing/rest/v2/>

Forcing Workflow Actions in Sandbox

There are a few key points in the workflow of a loan project that in the production environment requires GoodLeap team members to complete actions. So that you are able to fully utilize the test environment to simulate these flows in production, we have created a toolbox API that will allow clients to complete these actions directly via API calls:

- To clear stipulations on a loan, make the following API call: **POST** <https://sandbox01-api.goodleap.com/toolbox/rest/v2/loans/:loanId/clear>

Request body

```
1 {
2   "what": "STIPULATIONS"
3 }
```

- To clear contract review on a loan, make the following API call: **POST** <https://sandbox01-api.goodleap.com/toolbox/rest/v2/loans/:loanId/clear>

Request body

```
1 {
2   "what": "CONTRACT_REVIEW"
3 }
```

Contract review

Notice to Proceed (NTP)

Installation

Credit valid through 12/11/2023, 12:59 AM MST

Funding

Permission to Operate (PTO)

After a loan is approved, there are a few more steps in order for the loan to proceed through to NTP and then funding and PTO. The steps involved are as follows:

- Send loan docs
- Clear any possible cases (stipulations)
- Enter project info
- Verify loan details
- Perform any change orders that might be needed
- Mark loan as `INSTALL_COMPLETE`
- Mark loan as `PTO_COMPLETE`

Loan Status

Status events can be received as they occur using our webhook and email notifications (see the Webhooks / CRM section below), or you can retrieve the status of a loan and when certain events occurred using the [GET /v2/loans/:loanId/status](https://sandbox01-api.goodleap.com/toolbox/rest/v2/loans/:loanId/status) endpoint.

Sample response

```
1 {
2   "submittedAt": "2023-06-14T00:19:10.247Z",
3   "approvedAt": "2023-06-14T00:19:20.976Z",
4   "docsSentAt": "2023-06-14T00:49:22.977Z",
5   "docsSignedByPrimaryAt": null,
```

```

6      "docsSignedBySecondaryAt": null,
7      "hicSignedAt": null,
8      "projectDetailsUpdatedAt": null,
9      "loanConfirmedAt": null,
10     "ntpCompleteAt": null,
11     "installationCompleteAt": null,
12     "ptoCompleteAt": null,

14     "cpcStatus": null
15  }

```

Send Loan Docs

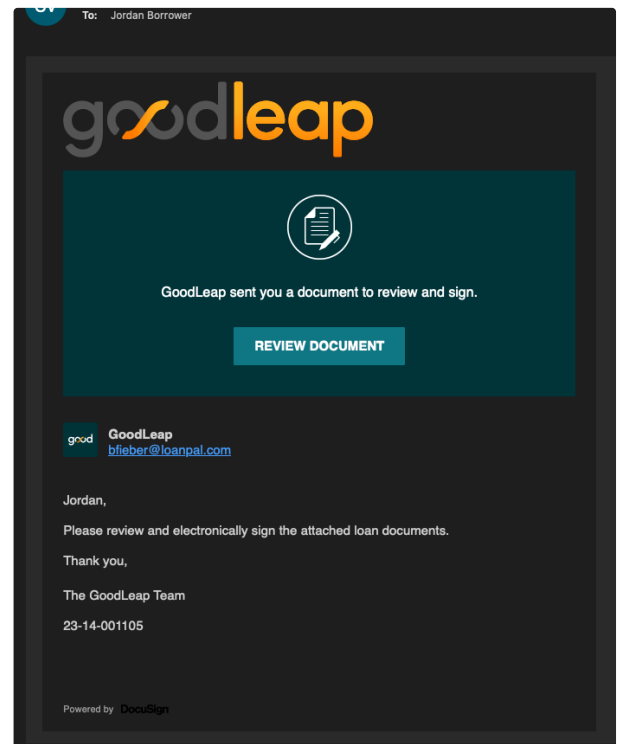

After a loan is submitted, the customer will receive an email notification with a link to request their loan documents. We also provide the option for you to request loan documents be sent through our api:

- [POST /v2/loans/:loanId/documents](#)

Remote Document Experience

The customer will then receive an email with a link to review and sign their documents.

▼ Sample email

Sample loan docs notification email

Embedded Document Link

We also offer an embedded documents experience, where you can make a request to:

- [GET /v2/loans/:loanId/documents/embedded](#)

to get a url for use in an iframe within your own site:

▼ Sample response

```
1 {
2   "url": "https://demo.docusign.net/Signing/MTR
3   "expiresAt": "2023-06-14T23:07:24.849Z"
4 }
```

Clearing Cases/Stipulations

During the underwriting process, additional documents or verification might be needed from the customer. These cases (or stipulations) need to be cleared before the loan can pass the contract review stage.

A list of cases can be retrieved by making a call to the [GET /v2/loans/:loanId/cases](#) endpoint.

▼ Sample response

```

100 },
101 ...
102 ]

```

Once you have the case ID from the cases endpoint you can request a single-use signed URL to upload documents to in order to satisfy the requirements of the case:

- [GET /v2/loans/:loanId/cases/:caseId/uploadurl?docType=DRIVERS_LICENSE](#)

▼ Sample response

```

1 {
2     "fileName": "DriverLicense.png",
3     "uploadUrl": "https://s3.us-west-2.amazonaws.
4 }

```

You can then make a PUT request to the uploadUrl with the binary file and it will be saved to the case under the fileName shown.

Enter Project Info

The project info endpoint allows you to provide detail for the list of components that make up the project.

- [PUT /loans/:loanId/project](#)

▼ Sample request

```

1 {
2     "components": [
3         {
4             "type": "INVERTER",
5             "manufacturer": "Delta"
6         },
7         {
8             "type": "PANEL",
9             "manufacturer": "Silver"
10        },
11        {
12            "type": "SYSTEM_SIZE",
13            "value": 12.051
14        },
15        {
16            "type": "SYSTEM_EAP",
17            "value": 1205

```

```

18     },
19     {
20         "type": "BATTERY",
21         "manufacturer": "Silver",
22         "quantity": 1,
23         "capacity": 12.03
24     }
25 ]
26 }

```

Note: A list of accepted manufacturers can be retrieved for every component type within a given category through the [GET /v2/categories/:loanId/components](#) endpoint

Verify Loan Details

Verify the selected offer Id and amount of the loan using the [POST /v2/loans/:loanId/details](#) endpoint.

▼ Sample request

```

1 {
2     "offerId": "677d75f3-6f23-4c33-b07a-00339c32e
3     "amount": {
4         "type": "USD",
5         "value": 20485.55
6     }
7 }

```

Change Orders

Sometimes a loan needs to be modified, whether that means changing the loan offer, the loan amount, or the enrollment in autopay. Change orders can be initiated by making a request to the [POST /v2/loans/:loanId/changeorders](#) endpoint.

▼ Sample request

```

1 {
2     "changes": [
3         {
4             "type": "AMOUNT",
5             "value": {
6                 "type": "USD",
7                 "value": 22485.55
8             }
9         }
10    ]
11 }

```

Transition a Milestone

A loan can be marked as `INSTALL_COMPLETE` or `PTO_COMPLETE` by using the `POST /v2/loans/:loanId/milestones` endpoint.

▼ Sample request

```
1 {
2   "name": "INSTALL_COMPLETE",
3   "completedAt": "2023-06-13T19:42:03.050Z"
4 }
```

Webhooks / CRM

We offer webhook functionality to notify you of events that occur in the lifecycle of a loan. By providing us with an endpoint where we can push these webhooks, you are able to receive updates on the status of your loans as they happen.

Each event can be configured to send a webhook notification, an email notification, or both.

Below is an example message body you would receive for the `ApplicationSubmitted` event. Webhook messages follow this basic structure with some having a few additional fields. The full list of webhook events (along with brief descriptions) can be found in our documentation here:

<https://developer.goodleap.com/docs/webhooks>

▼ Webhook message body sample

```
1 {
2   "event": "ApplicationSubmitted",           // Th
3   "applicationId": "17-01-000001",         // Th
4   "timestamp": "2017-10-18T21:33:30.209Z", // Th
5   "referenceNumber": "123456"              // Th
6 }
```
